Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 7-9, 14-16, 22-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kitao, et al (6,182,784).

Kitao, et al teaches an ATV comprising a frame 1; only four wheels 2 suspended from the frame, two of which are front wheels and two which are rear wheels, the front wheels defining a front axis and the rear wheels defining a rear axis; two shock absorbers 7 connected to the frame wherein the shock absorbers are associated with the rear wheels; a power unit 17 for driving at least one of the wheels disposed on the frame; a straddle-type seat supported by the frame; a drive shaft (not shown); a differential (not shown) operatively interconnecting the drive shaft; an universal joint and a handlebars 5. With respect to the wheelbase, it would have been an obvious matter of design choice to have the wheelbase a specific size and/or a size within a specific range, since such a modification would have involved a mere change in the size of a component. A change in size is generally recognized as being within the level of ordinary skill in the art, as well as, discovering the optimum or workable ranges involves

only routine skill in the art. With respect to the air pressure in the tires, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have a specific amount of air in the tires a, since it has been held that discovering an optimum value of a result effective variable involves only routine skill in the art.

Response to Arguments

3. Applicant's arguments filed December 13, 2004 have been fully considered but they are not persuasive. The reference clearly teaches the claimed invention.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

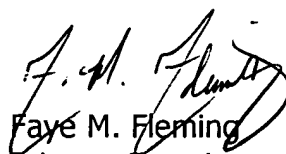

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
